DETAILED ACTION

Withdrawal of Allowable Subject Matter

1. The allowableness of claims 21 and 37 is being withdrawn in light of a more careful review of the reference to ELDERSON.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claim 21 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #5,784,850 to ELDERSON. ELDERSON discloses the use of a stud/bridging spacing system including a plurality of spaced apart studs (14) having a web (18); wherein the system comprises a means (16) for spanning the webs (18) of studs (14) and a means (50) for engaging the webs (18) of the studs (14). The means (16) for spanning the studs is V-shaped and the means (50) for engaging the studs (14) is also V-shaped in that the means (50) is widened at the mouth and is narrower closer to the opening (44).
4. Claim 37 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #5,784,850 to ELDERSON. ELDERSON discloses the use of a wall arrangement inherently including a first vertical surface means (the wallboard), a second wall means (14) extending perpendicularly thereto and having a web (18) and an opening (22), a means (16) for spanning

the webs (18) of studs (14), a means (50) for engaging the webs (18) of the studs (14), and a means (48) for attaching the means (16) for spanning the studs (14).

Allowable Subject Matter

5. Claims 1,4-20, 22-24,27-36 and 42-43 remain as being allowed.

6. Claims 45-49 are allowed.

7. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 1,4-20,22-24,27-36 and 45-49, the prior art of record fails to teach the use of a stud spacing apparatus including the combination of a plurality of studs, a bridging member, a stud engager, and a face bracket attached to the bridging member configured to receive a portion of the stud and having angled first portions and a pair of right angled second portions.

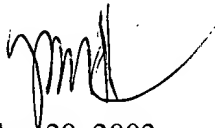

In reference to claims 42-43, the prior art of record fails to teach the method of constructing a wall including the step of attaching a bracket after inserting a bridging member. The closest prior art of record, US Patent #4,693,047 teaches the basic method except the bracket has engagers that engage the bridging member and not the stud.
